January 2024 - March 2024

Modeling and forecasting government bond spreads in the euro area: A GVAR model.

Pricing Options with the Finite Element Method

Milan, Italy

Implemented a pricing algorithm for basket options with the finite element method using FreeFem++.

WORKING PAPER

Optimal Monetary Policy and Non-Linear Pass-Through (Boggetti, Monacelli, Thaler, Karadi)

First Draft

State-dependent pricing in a small open economy yields a convex Phillips curve and size-dependent import pass-through; optimal monetary policy leans harder against large cost shocks.

AWARDS

Bocconi Graduate Merit Award

September 2022 - September 2024

Full tuition waiver for the MSc in Finance, reserved for students in the 98th percentile.

Mario Negri Scholarship

2014 - 2019

High school scholarship awarded based on GPA.

WORK EXPERIENCE

European Central Bank - DG Research

Frankfurt, Germany

Research Analyst, Financial Research Division

September 2025 - September 2026

Research: Karadi, P. et al., "Strike While the Iron Is Hot" - authored the **Optimal Simple Rule section**; conditionally accepted at the *American Economic Review* (**Top 5**). Aoki, K. & Nikolov, K., "Technological Bubbles and AI" - first draft.

Policy: analysis of **oil-supply shocks** (Iran), with A. Nakov and O. Tristani, presented to **Ms. Schnabel**; regulatory complexity and **bank competitiveness**, with D. Marqués-Ibáñez, presented to the **Executive Board**, including a briefing for President **Lagarde**.
