Modeling and forecasting government bond spreads in the euro area: A GVAR model.

Pricing Options with the Finite Element Method

Implemented a pricing algorithm for basket options with the finite element method using FreeFem++.

Milan, Italy

WORKING PAPER

Optimal Monetary Policy and Non-Linear Pass-Through (Boggetti, Monacelli, Thaler, Karadi)

First Draft

State-dependent pricing in a small open economy yields a convex Phillips curve and size-dependent import pass-through; optimal monetary policy leans harder against large cost shocks.

AWARDS

Bocconi Graduate Merit Award

Full tuition waiver for the MSc in Finance, reserved for students in the 98th percentile.

September 2022 - September 2024

Mario Negri Scholarship

High school scholarship awarded based on GPA.

2014 - 2019
